

Do you care or support someone aged 65 to 75 years?

Are you interested in sharing your experiences of mobility and walking?

Would you like to help guide the development of a new mobility aid?

If so, we would like to hear from you!

We would like to learn about the mobility issues that affect older people. We plan to bring a group of carers together to discuss these in a focus group. We will record the conversations (which won't be made public) and may use the information to help with the design of new mobility aids.

If you would like to know more or take part, please contact [REDACTED] to collect an information pack.

Where and When?

We plan to conduct our focus groups at the University of Surrey. Provisional dates are 16th, 23th, 28th and 31st October; 4th and 7th November 2013.

Light refreshments will be provided.
Help with some transport costs is available.

Who are we?

Dr **Graham Webb** is a Research Fellow in the Centre for Biomedical Engineering

Dr **Khim Horton** is a Senior Lecturer in the School of Health and Social Care, Faculty of Health and Medical Sciences

Professor **David Ewins** is a Consultant Clinical Scientist from the Centre for Biomedical Engineering

If you have any questions please contact Graham on [REDACTED]
